OUR SOLUTIONS

Roofing

Cladding

Sustainable

**A distressed
SURFACE
AND TAIL**

An irregular effect to reinforce the aesthetic appearance of tiles eroded over time with a variable granular deposit on the surface.

**Traditional
FIRING OVER
A WOOD FIRE**

**A FORMAT
ADAPTED FOR
ancient roofing**

**Variable TILE
LENGTH**

Each tile has a slightly different length to reflect the irregularity of old roofs. Our unique cutting system enables 50% of tiles to vary in length by 1cm.

MANUFACTURED WITH A RUSTIC APPEARANCE

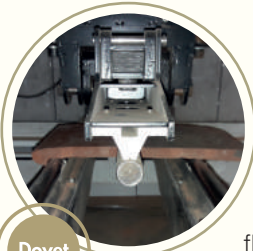

IDEAL FOR HISTORICAL ROOFS

**Traditional
APPEARANCE**

True to tradition, tiles have a longitudinal camber and subtle cross-camber.

Doyet

**Strong
AND durable**

Doyet clay has exceptional flexural strength properties and comes with a comprehensive 30-year guarantee.

OVERALL DIMENSION (mm)	THICKNESS (mm)	TILE WEIGHT (kg)	GAUGE OF 100 mm	NUMBER PER M² (mm)	MAX BATTEN GAUGE (mm)	QUANTITY PER PALLET
275x170	12,5	1,38	60	60	100	720

If you're looking to match with the local English heritage, 17X27 HANDCRAFTED CHILWORTH PLAIN TILES are the perfect solution. We offer you traditionally made clay tiles but fired in modern kilns for durability.

Our focus on skills with tradition and undeniable expertise in manufacturing guarantees unrivalled beauty blending seamlessly with the local vernacular.

We understand your requirements and want to work with you to produce an exceptional roof.

YOU TOO, ADOPT A DIFFERENT LOOK AT HERITAGE.

17X27 HANDCRAFTED CHILWORTH CLAY PLAIN TILE

OUR TILE FOR ALL *historical*
and traditional ROOFING PROJECTS

Our aim is to preserve your local heritage, so we have created our 17X27 HANDCRAFTED CHILWORTH PLAIN TILE, ideal for all historic and traditional roofing projects.

In following tradition, we offer you a tile to create your own authentic style.

After grinding and extruding the clay, the tiles are dried with wood bark and then fired with sawdust. This manufacturing process uses 100% green energy.

We use traditional firing techniques, with a wood fire, to create unrivalled blends of colours and hues within each batch.

Tiles are fired at an average temperature of 1000° for 2 days, with subtle variations depending on the position of tiles within the kiln ensuring each tile is unique in shape and finish.

With its *Vézère* colour, this new tile perfectly matches local English Heritage.

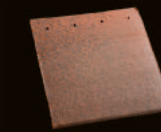

COLOUR

VÉZÈRE

Discover the *Vézère* colour, in red and brown tones, with its crafted irregular surface finishes, to perfectly display the authentic and timeless appeal of traditional English roofs.
